

## **Motion from Oxfordshire SHA**

This branch recognises the seriousness of the current health emergency and recognises the deaths follow a horrific pattern of discrimination against working class communities and BAME groups. We believe it is essential that Labour, as a workers party, is allowed to function and make decisions (on line if need be). We urge the ban on decision making party meetings to be lifted forthwith by the NEC.

Since Socialist societies elect their own representative to the Labour Party NEC, can we ask our Socialist Society representative to raise this issue.

Can we make a submission through the national policy forum processes.
